

We plan to use some of the materials in the future - specifically this year we will be using them during our whole school arts week.

The course was interesting and useful - it has given me ideas on how to access art from galleries around the world and also some themes

The materials on the website are easy to navigate.

It was very inspiring and given me lots of food for thought. I shall now have a look and see how I might fit more art into the subjects I am teaching. All the materials look fantastic and really easy to use. Thank you all for letting me join you.

I think this has been both interesting and inspiring. I am looking forward to using the Nature module with my class. Many thanks for everything - the website is simple to use and I have enjoyed navigating it and looking at the resources.

I have thoroughly enjoyed this course, Lots of great ideas. More please.

From the Swedish point of view, it has been extremely interesting to hear about your work in your different schools! Thanks a lot!

Thank you for accepting me on this Arts Course. I found it extremely interesting and gained a lot of ideas that I can apply to our learning.

I would love to stay in touch to share more ideas and would be happy to join any other courses you all may do.
